

## Stainless Steel Disabled Toilet Kit

# news

Suitable for harsh environments the Stainless Steel disabled toilet kit offers an attractive and robust alternative to our standard plastic kit, a fully compliant BS8300:2009 emergency alarm kit.

## New - Stainless Steel Kit

### Main Features

We are pleased to offer a stainless steel kit as an addition to our successful range of W/C alarms.

Our stainless steel kit has been designed to provide a robust alternative suitable for harsh environments. As with the rest of our range it is a reliable and simple method of calling for assistance. Compliant to all recent guidelines this kit contains everything required (except fixing boxes & cables) for a complete emergency alarm as stated in BS8300

#### Features:

Attractive design with the central controller now on stainless steel.

Simple to install using 4 core security alarm cable ideal for most applications.

Built in relay output allowing for external system integration.

Built in battery back up and self test facility.

Additional components can easily be added to the system.

If you would like further information on this kit or any of our other disabled toilet range of accessories, please contact us.
